VISUAL FIELDS EXAMINATION MACULAR DEGENERATION EXAMINATION

We now have two new highly sophisticated computerized instruments that allow us to provide a more thorough medical analysis of your eyes. A **HUMPHREY VISUAL ANALYZER** electronically measures retinal function and sensitivity to light. This measurement can assist us in early detection of many disorders including brain tumors, glaucoma, diabetic retinopathy, and retinal detachment.

The **FORESEE MACULAR ANALYZER** is designed to reveal early macular degeneration at its onset before damage can cause permanent vision loss.

We strongly recommend that all of our patients receive the screening version of this test. They are especially important for people that have:

1. Headaches
2. See spots or flashes of light
3. A history of diabetes
4. A history of high blood pressure
5. Circulatory problems
6. A strong eye glass prescriptions
7. Reached age 35
8. A family history of macular degeneration

There is a charge of **\$75.00** for the visual fields analyzer and **\$75.00** for the macular degeneration analyzer. If you choose both tests the fee is reduced to **\$125.00**. **These additional tests must be paid in full at time of visit. You will be provided with a detailed receipt to submit to your major medical insurance company for possible reimbursement.**

Please check the appropriate lines and sign at the bottom.

_____ I DO want the visual fields screening.

_____ I DO want the macular degeneration screening.

_____ I DO want both screenings.

_____ I DO NOT want the screenings.
